Restart Vaccination March Offer

£50.00 *instead of* £75.00

During March on Tuesdays and Thursdays we will be offering dog and cat restart vaccination at the price of our booster.

When did your pet last have a vaccination? Did you know that the WSAVA 2024 vaccination guidelines recommend annual vaccinations for certain diseases? Vaccination numbers have declined in our pet population in recent years, and as a result we are seeing an increase in cases of these diseases. Some pets can't be vaccinated due to other health conditions, so it's important to have as many pets as possible fully vaccinated to provide "herd immunity" to these more vulnerable patients. If it's been over 15 months since your pet had a vaccination, they will need a vaccination course to bring their immunity back up to a protective level. We are currently offering these courses at a reduced price to help you get your pet fully protected. Your appointment will include a full health check for your animal with the vet and you can discuss any concerns you may have.
